WORK EXPERIENCE

Ledo digital - Senior Product Designer & Design Engineer | April 2025 - Present

- **AI-Native Token-to-Code Pipeline:** Shortened feature design-to-production cycles by 40% (from 15 to 9 business days) and cut visual QA regressions in half by translating Figma Variables directly into production React, TypeScript, Tailwind CSS, and Shadcn UI components (140+ documented Storybook states) via Figma MCP, Cursor, and Claude Code with direct GitHub PR handoff.
- **Cross-Platform Token Synchronization:** Maintained unified W3C token specifications across React web apps and native iOS, Android, and watchOS clients (exporting semantic tokens to CSS Variables, Swift, and Kotlin XML) for a US AI lending platform (45,000+ monthly sessions), the Arena social app (60,000+ MAU), and mobile AI apps (85,000+ MAU).
- **High-Density State Architecture:** Shipped a unified 3-panel CRM component workspace (doubling operator capacity from 3 to 6 concurrent chats) and consolidated 4 mobile trading tabs into a single-screen execution layout for Ndax ($215M+ monthly volume) by coding exhaustive state matrices (streaming UI, HITL toggles, live order books).

Already Media - Senior Product Designer | October 2024 - March 2025

- **WCAG 2.1 AA Component System & Code Prototypes:** Accelerated frontend assembly across 6 core modules for 2 high-load platforms (320,000+ combined MAU) by building a 95+ accessible component library (ARIA roles, keyboard navigation, responsive data grids) and validating 45-attribute real-time filtering in live React and Tailwind CSS prototypes - helping reduce bounce rate from 54% to 38%.

YUAL - Senior Product Designer | October 2022 - September 2024

- **Multi-Brand White-Label Token Engine:** Cut operator reskinning and launch Time-to-Market by 73% (from 30 to 8 business days) across 14 independent brand deployments on a 240,000+ MAU platform by co-architecting a 3-tier W3C token pipeline (migrating from Tokens Studio to Figma Variables and Style Dictionary JSON exports).
- **DesignOps & Component Governance:** Standardized Figma component anatomy, pre-signature wallet security components for Zircuit ($110M+ TVL), DeFi health-factor gauges for Glue ($35M+ TVL), and mandatory Design QA checklists across 6 product tracks while mentoring 6 product designers.

Magic Powered - Product Designer | April 2021 - September 2022

- **Foundational Web3 UI Libraries:** Architected the ecosystem design system for Metaplex (Solana NFT Creator Studio) and built 2 full-scale Figma component libraries (160+ components) powering Nomiswap DEX ($40M+ TVL), GhostMarket, and ShroomRadar across 2 engineering squads.

Self-Employed - Product (UX/UI) Designer | October 2019 - March 2021

- **Modular UI Kits & Responsive Grids:** Built reusable Figma component kits, pricing matrices, and responsive layout systems for ModelX and 10+ B2B SaaS and e-commerce clients.
